

GLOBES

global linkages of biology, the environment, and society

Summer REU Projects

- Open to Notre Dame and non-Notre Dame undergraduates
- Mentored by GLOBES graduate students & faculty, special training workshops, lectures and group discussions, presentation and publication opportunities
- Research projects tackle issues in stream ecology, invasive species, climate change, infectious disease, public health risks due to the environment

Butterfly catching on Vancouver Island

Sampling Field Trip on Namekagon River, WI

Poster Presentation at REU Summer Symposium

Measuring stream storage potential in SE Alaska
